imAgine.py , the IT club of Ryan International School, Mayur Vihar organised its tech symposium "Imagine.py 2.0" from 1st to 6th September. It consisted of 12 different events ranging from design to coding to cryptic hunts for all age groups from classes 6-12. Simar Tandon of 11 B and Antara Vadhera of 9 E bagged the first position in the event "Tech Meetup." The event was a debate, with 25+ schools participating in the same. It consisted of several rounds, with teams being eliminated at the end of each round. Teams were given a topic on the spot with 10-15 minutes of preparation time after which they were supposed to voice their views on the given topic. The topics kept changing after every round. It is a matter of great pride that our students Simar and Antara secured 1st position in the event. Heartiest congratulations!
