Web-Development

The rules of the event are as follows:

● This is an **individual** website making competition.(**Not a team event**)

● The participants will be given a topic on which they will have to create a website.

● The participants **are allowed** to take help from online sites(W3 schools, StackOverflow), however there **are restrictions** on using online tools/templates from other sites. (ie. Wix, colorlib readymade templates, direct code from CodePen etc.)

● Participants are expected to create a fully functioning frontend. The backend of the website isn't required.

●Participants can use libraries and frameworks such as React, Vue.js, AngularJS

● The event will span over **3 days**.

● **On the first day, the topic/theme on which the website has to be made will be released.** Participants are expected to start work on their website as soon as the topic is released.

● **Participants will have the next 2 days after that.**

● They are expected to **host their site** on any free hosting site (Netlify, Github, Heroku, Hostinger etc.) within 72 hours.

● If the Participant is unable to host the site, **they can send a .zip folder** on the ProjectBeta email.

● **Finally, the link to the hosted webpage has to be sent personally to the HoDs via WhatsApp.(Not on Web-dev Group)**
